

Roman Semak

Senior Frontend Engineer — Angular / React / Next.js

Lisbon, Portugal | Ukrainian | semak.roman@gmail.com | linkedin.com/in/roman-semak | github.com/roman-semak

PROFILE

Senior Frontend Engineer with 11+ years in IT and 8 years of Angular (v8-19). Shipped two high-volume NFT / gaming marketplaces in production — Mythical Marketplace (\$650M+ trading volume, 500K+ players) and DMarket (\$400M+ annual trading volume). Most recently delivered a React / Next.js gaming platform (Arena Pulse) single-handedly in 4 months — a scope typically staffed with a full team — by pairing senior engineering judgement with an AI-augmented workflow across feature delivery, refactors, test writing, code review and documentation. Mentored 5+ frontend course groups at prog.kiev.ua. Product-minded engineer with extensive startup and small-team experience: engaged from discovery and business / design discussions through delivery, and validating impact in production via A/B tests, business KPIs and technical metrics (Core Web Vitals, error rates, load times). Currently exploring Senior Frontend / Tech Lead opportunities, remote or EU-based.

WAYS OF WORKING

End-to-end ownership of delivery and outcomes | Working closely with business to clarify requirements | Ego-less collaboration | Bias toward fast, iterative MVP delivery

CORE SKILLS

- Angular 8-19 (Standalone, Signals), RxJS, Akita, @ngneat/elf
- React / Next.js: Hooks, Zustand, TanStack Query, SSR
- TypeScript (advanced)
- Tailwind CSS, shadcn/ui
- Web3: wagmi, viem, Privy, ERC-20 interactions
- Real-time: WebSockets (Centrifugo), Protobuf
- API: REST, GraphQL, Axios, OpenAPI (Swagger) codegen
- Performance & SEO: Core Web Vitals, Lighthouse, code splitting, image optimization, meta tags / Open Graph / structured data
- CI/CD & DevOps: GitHub Actions, Vercel multi-environment deployments, pipeline setup from scratch, close collaboration with DevOps
- Testing: Jest, jest-preset-angular, Angular TestBed
- AI-augmented development: Claude Code (MCP, agentic coding, sub-agents, UI generation), AI pair programming, LLM-assisted code review, AI-driven refactoring, prompt & context engineering, agentic workflows

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer — [Mythical Games](#) (Nov 2022 – Feb 2026, Remote)

- Joined as a Senior Frontend Engineer (Angular) on Mythical Marketplace as part of a small, tight-knit team, with close cross-functional collaboration with business stakeholders, designers and other teams on platform and feature delivery.
- Alongside Angular work, maintained and extended existing React / Next.js projects (identity / auth pages: login, signup, KYC), then rapidly transitioned to React / Next.js to launch Arena Pulse from scratch as the solo frontend engineer.

[Arena Pulse](#) — [React / Next.js](#) (Sep 2025 – Feb 2026, Mythical project)

- Performed Frontend Lead duties: owned architecture, feature delivery and backend API contract design; built the platform from scratch and delivered soft launch in 4 months.
- Gaming competition platform: on-chain challenges, leaderboards and rewards across multiple games.
- AI-augmented delivery across the full dev cycle (feature development, refactoring & migrations, unit tests, code review, ADRs & technical specs) — enabling solo delivery of a scope normally handled by a team.
- State management with Zustand and TanStack Query.
- Web3 wallet flows (WalletConnect, MetaMask, Privy) via wagmi / viem.
- Event-driven blockchain updates with WebSockets (Centrifugo).
- Set up GitHub Actions CI/CD and Vercel multi-environment deployments from scratch with DevOps; led adoption of trunk-based pipeline with simultaneous prod & staging deploys.

[Mythical Marketplace](#) — [Angular 19](#) (Nov 2022 – Feb 2026, Mythical project)

- NFT marketplace for in-game skin trading; 500K+ players, 44M+ transactions, \$650M+ trading volume across the ecosystem.
- Drove Angular version migrations end-to-end (up to v19), keeping the codebase current and unblocking new framework features.
- Owned key technical improvements: bundle size optimization, legacy refactoring and tech-debt reduction, and build pipeline improvements.
- Feature-based architecture with clear module boundaries, designed to support extraction into microfrontends; state management with @ngneat/elf.
- UI with Angular Material and Tailwind CSS; i18n via Transloco (10+ languages).
- Real-time updates via WebSockets (Centrifugo) and Protobuf; REST and GraphQL APIs with OpenAPI codegen.
- Unit and component tests covering all critical business flows (Jest, jest-preset-angular, Angular TestBed).

Frontend Engineer — [DMarket](#) (May 2017 – Nov 2022, Office / Remote)

- Gaming skin trading marketplace for CS:GO, DOTA 2 and other titles; \$400M+ annual NFT trading volume.
- Joined as an HTML/CSS developer and grew into a Frontend Engineer, working in a team of 3 frontend developers and owning core areas of the DMarket project end-to-end.
- Delivered core marketplace flows end-to-end: buy / sell / trade journeys, marketplace listings and advanced filtering, user authentication and KYC, payment-method integrations.
- Real-time trading and price updates via WebSockets across listings, order books and user inventories.
- Built admin panel from scratch end-to-end.
- State management with RxJS and Akita; Angular version upgrades (v7+); REST and GraphQL APIs.
- SEO & performance on public marketplace pages: per-item optimization, Core Web Vitals, structured data, code splitting and image optimization.
- Final year on a dedicated LiveOps team triaging and fixing all production bugs across the platform; sustained high incident volume with rapid hotfix turnaround directly to production.

Mentor — [prog.kiev.ua](#) (Mar 2017 – Mar 2019, Freelance, Kyiv, Ukraine)

- HTML/CSS frontend course for aspiring web developers.
- Designed and delivered a 20-hour program (4h/week) covering HTML5, CSS3, responsive layouts, Flexbox/Grid, SASS, and modern frontend tooling.
- Mentored 5+ groups of 10-15 students on average; guided students through homework assignments, code reviews and final projects.
- Handled classroom delivery, live coding sessions, and individual feedback on student code quality and best practices.

Frontend Developer — [Eduget](#) (Jan 2016 – Aug 2016, Kyiv, Ukraine)

- Online educational platform offering video courses across multiple disciplines.
- Built landing pages and contributed to main platform development as part of the frontend team.
- Stack: HTML5, CSS3, SASS, Gulp, JavaScript, jQuery, Photoshop (PSD-to-HTML).
- Produced an HTML/CSS educational video course published on the platform — authored lesson plans, on-camera delivery and code examples.
- Collaborated with designers and content producers on course structure and visual design.

Frontend Developer — [UMH Group](#) (Nov 2014 – Jan 2016 | Jan 2016 – Jan 2018 Freelance, Kyiv, Ukraine)

- Major Ukrainian media holding with multiple news, entertainment and lifestyle digital properties.
- Developed special projects and landing pages — from PSD mockups to fully responsive, cross-browser production pages.
- Stack: HTML5, CSS3, SASS, Gulp, JavaScript, jQuery, Photoshop.
- Worked closely with designers and editors to translate creative concepts into pixel-perfect layouts on tight deadlines.
- Continued as a freelance contributor after transitioning to full-time roles elsewhere, delivering one-off special projects through 2018.

EDUCATION

Master's Degree in Computer Science (Computer Science in Management) — AGH University of Science and Technology, Kraków (2012–2014) | GPA 4.15/5.0

Specialist Degree in Informatics — Precarpathian University (2008–2013)

LANGUAGES

Ukrainian — Native | English — Professional Working Proficiency | Polish — Intermediate
